

Long lasting, high performance filtration with a professional grade sediment pre-filter reduces 97% of chlorine in addition to other harmful contaminants including chloramines for great-tasting, healthy water throughout your entire home.

Features and Benefits

- Proven to reduce harmful chloramines, an aggressive disinfectant made of chlorine and ammonia, used in the water treatment process
- High-potency NSF Certified media effectively remove up to 97% of chlorine and reduce numerous other harmful contaminants including: pesticides, herbicides, rust, water soluble metals and industrial solvents
- Provides healthy, odorless, great-tasting water throughout the entire house
- Includes upgraded sediment pre-filter for additional sediment filtration
- Does not require electricity, drainage, or back-flushing and does not create waste water
- Easy installation and replacement of tanks, lasting 4-6 years or 400,000 gallons
- Delivers the healthiest showering experience for softer skin and shinier hair
- Improves air quality by reducing vaporized volatile organic compounds produced by chemicals

What's inside

Specifications

Model: EQ-400 (for ¾" pipes)
Model: EQ-401 (for 1" pipes)
Replacement filters:
Main tanks: EQ-400R
Pre-filter: EQ-PFC.10
Rated service flow: 7 gpm
Max working pressure: 20-100 psi
Max operating temperature: 40-90° F
Recommended capacity: 400,000 gal

A double manifold system is available for homes larger than 3-4 bathrooms.

Install kits available in:
EQ-300-MFLD (for ¾" pipes)
EQ-301-MFLD (for 1" pipes)
